

Raising the Standards in Underground Enclosures

GlasMasters Enclosures

Corrugated enclosures are for use with large equipment which have traditionally been installed in large precast concrete vaults.

Our enclosures come with preinstalled lifting provisions and because they are so light, they can be easily set in place using only an excavator.

All corrugated vaults come with multi-piece lids for easy removal to access the equipment once the vault is installed.

Just like our smaller enclosures, the corrugated enclosures can be customized with logos and colors to specify the details of the enclosed equipment.

With load ratings up to Tier-22, we have a vault for every service type and location.

Sizes

Product Sizes

36" x 60"

48" x 96"
